INDEX

ATOMIC ENERGY COMMISSION

A

Page

Atoms-for-peace ship 27

B

Budget, 1957 116

D

Demonstration plants abroad, proposal for 114

E

Electricity, competitive production from nuclear power 107

F

Federal Government, progress by 72

I

Information on atomic energy, availability of 95
International cooperation 13, 20, 26, 71
Isotopes:
  Definition of 6
  Industry and agriculture, use in 11, 186
  Subsidy, increase in 193

L

Leadership of United States in research 18
Liability insurance 45

M

McKinney report, discussion of 113
Military and industrial programs, percentage of 23, 33

N

Need for program of 40

O

Obligations and expenditures, status of 337
Operating expenses 4, 122
  All programs—AEC direct employment 260
  Biology and medicine 15, 54, 175
    Advances in 54
    Cancer research 185, 189, 196
    Disposal of atomic waste 197
    Genetic effects of radiation 182, 188, 196, 198
    Grants 56

Liability insurance 45

M

McKinney report, discussion of 113
Military and industrial programs, percentage of 23, 33

N

Need for program of 40

O

Obligations and expenditures, status of 337
Operating expenses 4, 122
  All programs—AEC direct employment 260
  Biology and medicine 15, 54, 175
    Advances in 54
    Cancer research 185, 189, 196
    Disposal of atomic waste 197
    Genetic effects of radiation 182, 188, 196, 198
    Grants 56

Operating expenses—Continued	Page
Biology and medicine—Continued	
Increase for	187
Isotope subsidy, increase in	193
Radiation:	
Detrimental effects, combating	192
Equipment studies, increase for	194
Humans, effect on	182, 188, 196, 198
Radioactive fallout	187
Community program	16, 199
Disposal of communities	16, 109, 205
Delay in	209
Housing and Home Finance Agency, responsibility for sales	208
Priorities for occupants, designation of	207
Sale, method of	206
Expenditures and revenues at Oak Ridge and Richland	210, 221
Oak Ridge:	
Expenditures and revenues at	210, 221
Operation at	204
Occupants of housing	216
Prospective revenues, decrease in	221
Rentals, basis for	211
Rent policy	217
Richland:	
Expenditures and revenues	210, 221
Services provided to tenants, payment of	220
Taxes paid by residents	220
Language changes	267
Other costs and applied revenues	248
Physical research program	158
Extranuclear properties, decrease for research in	167
High energy acceleration, increase for	166
Offsite research contracts	171
Production, treatment, and properties of materials	169
Security measures	169
Training in	170
University and other private laboratories, assistance from	165
Program direction and administration	16, 223
Reactor development program	8, 143
Army package power reactor	43
Civilian power reactors	9
Aircraft, development to propel	33
Classes of reactors	111
Construction materials, quality and performance limitations in	131
Hazards of	35
Liability insurance	45
Types, development of	39
Yankee atomic power reactor	43, 91
Security investigations	236
Access to restricted areas	240
FBI, security investigations of	243
Foreign governments, security clearance of personnel of	244, 245
Individuals denied clearance but subsequently cleared	245
Loyalty, effect on security	242
Reinvestigations	238
Russian espionage, success of	247
Selected resources, increase or decrease in	254
Source and special nuclear weapons	7, 125
Availability of fissionable material for civilian use	130
Brazilian ores, embargo on	155
Costs of raw materials	127
Gems, irradiation of	137
Guaranteed ore procurement	132
Harshaw Chemical Co., Oak Ridge, dismantling of plant of	135
Lignites, uranium from	135
Personnel, number of	134

Operating expenses—Continued
Source and special nuclear weapons—Continued Page
Shales, extraction of uranium from 157
Uranium and other strategic materials, procurement of 126
Uranium concentrates, procurement goal for 138
Weapons program 4, 139

P

Permits for access to AEC information 74
Plant acquisition and construction 3, 14, 32, 271
Additional atomic plants, building of 48
Administrative construction 331
Biology and medicine program 321
Community program 325
High energy accelerators 14
Language changes 335
Physical research program 313
Reactor development program 297
Aircraft nuclear propulsion plant and test area, Arco, Idaho 312
Argonne National Laboratory:
Chemistry cave for radioactive materials 300
Transient housing 301
Bettis Field, purchase of 303, 309
Engineering conclusions and estimates, accuracy of 304, 311
Excess plants, use of 309
Food irradiation facility 305, 310
General plant projects 308
Power reactor development acceleration plant 307
Research and development test plant 305
Sherwood plant 307
Surface ship reactor facility 308
Source and nuclear materials program 274
Analytical Laboratory addition, Grand Junction, Colo 280, 283
Chemical processing facility, St. Louis, Mo 286
Feed materials plants, additional 284
General plants projects 288
Off-site access roads, Colorado Plateau and adjacent areas 277, 280
Service plant, Oak Ridge, Tenn., renovation of 288
Weapons program 289
Livermore, Calif.:
Programing building 296
Weapons development and engineering facilities 291
Nevada test site, base construction 294
Pacific proving ground, base construction 289
Sandia, warehouse at 295
Storage site modifications 293
Weapons production and development plant 292
Private industry, progress by 72

S

Scientific and technical personnel:
Salaries of 93
Shortage of 17, 49, 97
Supply and demand for 69
Training of 24, 29, 90, 170
Schools, bringing atomic energy to 103

T

TVA power, importance to Oak Ridge 100

U

United Kingdom nuclear power program 99
